
Holstein: Hermitian completion of saved upper triangle
Minimum eigenvalue
Equilibration time (fs)
gamma=600, omega0=320
gamma=300
gamma=50
Holstein: equilibrium consistency check
a^2/fs
Current correlation time (fs)
gamma=300 Re integral
gamma=300 Im check
gamma=50 Re integral
gamma=50 Im check
Holstein: electronic kinetic energy
Energy (cm^-1)
Equilibration time (fs)
gamma=600, omega0=320
gamma=300
gamma=50
Lattice Froehlich: Hermitian completion of saved upper triangle
Minimum eigenvalue
Equilibration time (fs)
gamma=300
gamma=50
Lattice Froehlich: equilibrium consistency check
a^2/fs
Current correlation time (fs)
gamma=300 Re integral
gamma=300 Im check
gamma=50 Re integral
gamma=50 Im check
Lattice Froehlich: electronic kinetic energy
Energy (cm^-1)
Equilibration time (fs)
gamma=300
gamma=50
